## 1 Working out charges (you must fill in this section)

Summary of charges				
Type of water discharge activity or groundwater activity	Standard charge or reduced charge	Number of activities at this charge rate	Charge for each facility (£)	Charges due (£)
Other charges				
Ground source heating and cooling system scheme (water resources charge)				
<b>Total Charge</b>				

You have to submit an application fee with your application. To find out the charge:

- Refer to the relevant standard rules permit page;
- Visit the ‘Making an application’ webpage. This can be found at the Environment Agency website <http://www.environment-agency.gov.uk/business/topics/permitting/32318.aspx>; or
- Visit the current environmental permitting charging scheme. This can be found on our guidance webpages and sets out our charges under the Environmental Permitting Regulations 2013.

Please remember that the charges are revised on 1 April each year and that there is an annual subsistence charge to cover the costs we incur in the ongoing regulation of the permit.

## 2 Water discharge activity and groundwater activity point source discharges

The application charge is a fixed charge, although two rates exist: standard and reduced. The reduced application charge is applicable where the effluent is:

- sewage effluent where the proposed volume is five cubic metres or less per day;
- sewage effluent which contains trade effluent or other matter where the proposed volume is five cubic metres or less per day;
- trade effluent from cooling or heat exchange where the proposed volume is ten cubic metres or less per day;
- surface water not containing trade effluent;
- site drainage;
- effluent or substance discharged or disposed onto or into land where the proposed volume is five cubic metres or less per day and discharge is on not more than six days per year or any such equivalent disposal.

The standard application charge applies in all other situations.

## 2 Water discharge activity and groundwater activity point source discharges, continued

The charge applies to each discharge you will be making. Therefore two discharges of sewage effluent of five cubic metres a day will attract two reduced rate charges.

Please contact us, using one of the options in section 8, for details of current reduced and standard application charges. Please note that the charges are revised on 1 April each year.
